

Step 2. Map GPT's Purpose to 5 Components

<p>Role What perspective should the GPT take?</p>	
<p>Intent What do you want the GPT to accomplish? What is the main task this GPT should help with? What outcome do you want every time you use it?</p>	
<p>Context Who is this for? Context is everything GPT needs to do the job well. This includes your audience, their skill level, and the environment.</p>	
<p>Behavior & Tone How should the GPT communicate?</p>	
<p>Constraint & Tone What boundaries should it follow? What should it avoid or prioritize?</p>
